PV101 Day 06 Afternoon Lab: Hidden Fuse Challenge

"This system worked yesterday. Today it does not. Figure out why."

Rules

- No random part swapping.
- No fuse bypassing.
- Write down every measurement.
- Explain the evidence before replacing anything.

Troubleshooting Path

1. Observe the system.
2. Trace the power path.
3. Measure source voltage.
4. Measure into and out of protection devices.
5. Use continuity only when de-energized.
6. State the fault and evidence.
7. Replace the correct fuse and demonstrate operation.
