PV101 Day 8 Whiteboard Outline

Instructor-facing

Day_08_PV101_Final_Review_and_Assessment_2026-07-16

Board before students enter

- PV101 Day 8 | Review -> Final -> Reflection -> Closeout
- 25 questions | 25 points
- Safety overrides speed. Units count. Evidence beats labels.

Six review columns

- Energy path
- Electricity + formulas
- Meter verification
- Workmanship + serviceability
- Protection + troubleshooting
- Loads + sizing

Misconceptions to correct

- Wire colors and labels are hints—not proof.
- Continuity requires a de-energized circuit.
- A replaced fuse is not a verified repair.
- Series adds voltage; parallel adds current.
- A sizing answer without units or assumptions is incomplete.

Final-test boundaries

- Independent work.
- Clarify directions only.
- No answer coaching.
- Collect every test and scratch page.
