PV101 Day 3 - Whiteboard Plan

Rich solo teaching board material

Board 1: Today

PV101 Day 3 - Reading Review + Wire Lab

- Morning: Chapters 3-4 quiz + review
- Midday: solar system behavior
- Afternoon: wire stripping + crimping lab
- Goal: clean, inspectable work

Board 2: Solar Path

Sun -> PV Module -> Charge Controller -> Battery -> DC Loads

Battery -> Inverter -> AC Loads

Board 3: Words That Matter

Word	Meaning
Voltage	Electrical pressure
Current	Electrical flow
Power	Work being done
Energy	Power over time
PV	Sunlight to electricity
DC	One direction
AC	Changing direction

Board 4: Wire Lab Quality Standard

- Right strip length
- No missing strands
- Connector seated
- Crimp on metal barrel
- Passes tug test
- Easy to inspect later

Board 5: Exit Ticket

- One thing I can do now
- One thing I need to practice

PV101 Day 3 Whiteboard Plan

- Why clean wiring matters in RV solar
