# PV101 Day 8 - Student Hangout Room Setup Lab

*CTS Cohort 6 | Thursday 2026-07-16 | Practical Lab: Power, Layout, AV, Safety, and Commissioning*

Name(s): _____ Date: 2026-07-16

**Lab mission**
Set up the student hangout room so it is safe, usable, understandable, and ready for people to actually use.
This is not just "plug stuff in." This is a real small install: power, signal, layout, cord routing, audio/video testing, and final sign-off.

## Part 1 - Equipment list

| Item | Needs power? | Signal cable? | Notes |
|---|---|---|---|
| TV 1 | Yes / No | HDMI / Other | |
| TV 2 | Yes / No | HDMI / Other | |
| Nintendo Switch | Yes / No | HDMI | |
| Wii | Yes / No | AV / HDMI adapter | |
| Vizio surround sound | Yes / No | Optical / HDMI / Aux | |
| Couch 1 | No | No | |
| Couch 2 | No | No | |
| Other: | | | |
| Other: | | | |

## Part 2 - Room layout plan

Sketch the room. Mark screens, couches, consoles, speakers, outlets, walking paths, and where cords will run.

## Part 3 - Power plan

What outlet(s) are you using?

_____

_____

What devices plug into each outlet or power strip?

_____

_____

_____

Circle or check anything that should use surge protection:

[ ] TV(s)
[ ] Nintendo Switch
[ ] Wii
[ ] Sound system
[ ] Chargers
[ ] Other: _____

## Part 4 - Cord and equipment safety

Where are cords most likely to become a trip hazard?

_____

_____

How will you reduce that risk?

_____

_____

Safety checklist:

[ ] No cords stretched across walking paths
[ ] Power strips are not daisy-chained
[ ] Cords are not pinched under couch legs
[ ] Screens are stable
[ ] Consoles have airflow
[ ] Controllers can reach without pulling consoles down
[ ] Speakers are placed safely
[ ] Room can be cleaned around the setup

## Part 5 - Signal map

Draw or write what connects to what. Examples: Console -> TV, TV -> sound system, power strip -> devices.

_____

_____

_____

_____

## Part 6 - Test plan

[ ] TV turns on
[ ] Switch displays on screen
[ ] Wii displays on screen
[ ] Controllers work
[ ] Sound comes through correctly
[ ] Volume can be controlled
[ ] No buzzing or loose cables
[ ] Couches have a good viewing angle
[ ] Walking path is safe

## Part 7 - Final sign-off

What worked first try?

_____

_____

What did you have to troubleshoot?

_____

_____

What would you improve if you had more time or money?

_____

_____

What is one safety issue you fixed before calling the room done?

_____

_____

## Final idea

**Remember**
A good install is not just “it works.”
A good install is safe, understandable, serviceable, and usable.
